

# Quadrotech Archive Shuttle

Scalable, secure and automated solution for ZeroIMPACT email archive migrations

Migrating enterprise email archives can be an exceptionally large and complex project. To be successful, you need to preserve the email interdependencies, mitigate bandwidth constraints and deliver seamless user access throughout the migration.

Quadrotech Archive Shuttle by Quest is a proven archive migration tool that enables you to quickly migrate your email archive data and journals between archiving systems, including to Office 365 or Exchange, while maintaining compliance. With the help from email archive migration service specialists, you can:

- Ensure zero impact on end-users by providing anytime access to archives
- Preserve chain of custody with full audit trails and logging to mitigate risk
- Move only what's needed with intelligent filtering to reduce migration time and costs

## EMAIL ARCHIVE MIGRATION CAPABILITIES

With the understanding that not all email archive migration projects are the same, Quadrotech Archive Shuttle supports the diverse conditions found in enterprise environments, with customizable configurations to keep your stakeholders happy.

### Fast, Scalable Migrations

Archive Shuttle's Advanced Ingestion Protocol (AIP) cuts ingestion time and achieves speeds that are dramatically faster when migrating to Office 365 or Exchange when compared to traditional EWS or MAPI methods. The solution can transfer and manage huge volumes of data with a scalable, multithreaded approach while maintaining a lower ingestion error rate.

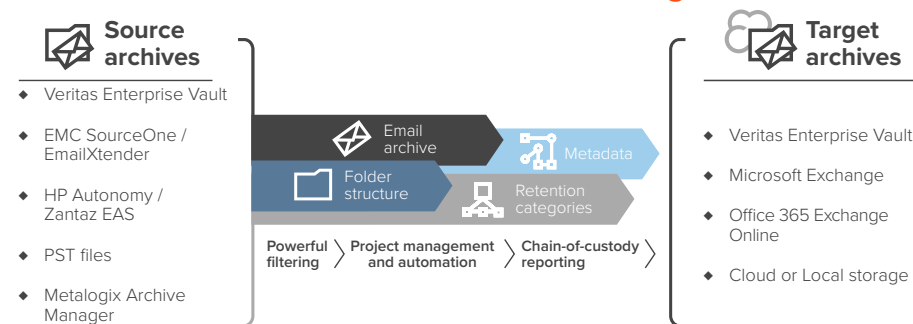

“Archive Shuttle was easy to install and setup, with the assistance of the consultant. The process was invisible to our users.”

Warwick B  
IT Manager

### BENEFITS:

- Migrate faster to Office 365 or Exchange than with EWS or MAPI methods
- Move email from legacy systems without any user disruption
- Rapidly advance from project start to the first item migrated in less than two hours
- Stay secure by ensuring that your email content never leaves your environment

## ZeroIMPACT email archive migration

Migrate email archives to the environment of your choice up to five times faster than other solutions that rely on Exchange Web Services

“Quadrotech helped us seamlessly migrate 15TB of data from Enterprise Vault to Exchange Online.”

Hemant Sohoni  
Intel Manager  
Toyota Financial Services

## SYSTEM REQUIREMENTS

### PROCESSOR (CORES)

Minimum 4, 8 Recommended

### MEMORY

Minimum 4GB, 8GB  
Recommended

### HARD DISK SPACE

2GB of Free Space

### OPERATING SYSTEM

Windows Server 2008 R2,  
2012, 2012 R2, 2016 and 2019

### ADDITIONAL SOFTWARE

Internet Information Services  
(IIS) 7.5 or later

NET Framework 4.5.2 or later

Internet Explorer 9 or later

SQL Server 2012, 2014,  
2016 and 2017

## SUPPORTED SOURCES

Veritas Enterprise Vault

EMC SourceOne / EmailXtender

HP Autonomy / Zantaz EAS

PST files

Metalogix Archive Manager

## SUPPORTED TARGETS

Veritas Enterprise Vault

Microsoft Exchange

Office 365 Exchange Online

Cloud or Local storage

### Preserves Chain Of Custody

Mitigate legal and regulatory risk by migrating email archives with air-tight security. You can automatically create and store a unique digital fingerprint of every migrated item. This enables you to capture full audit trails during every step of the project, while validating that migrated data has not been corrupted or tampered with. You'll also ensure superior fidelity, compared to traditional EWS methods, and preserve all folder structures and metadata, making chain of custody easier to validate.

### ZeroIMPACT To Users

With Archive Shuttle, users have uninterrupted access to their data. Archive Shuttle features Sync'n'Switch which uncouples data synchronization from user migration, preventing user disruption while email is migrated from the legacy archive to the new platform. An operator controlled staged workflow synchronizes archived content in the background and then switches users to the new system once the sync is complete.

### Automated Leaver Handling

Archive Shuttle enables organizations to easily detect and define different migration workflows for archived data of former employees, removing the need for manual intervention.

### Journal Transformation

Archive Shuttle has two journal migration options, each fully compliant, and both ensure the 100% preservation of email content. The Journal Explosion option takes every single e-mail exported from a journal archive and places it into every sender/recipient on the e-mail in a hidden portion of the user's mailbox. And the Virtual Journal option involves splitting the journal archive over multi-mailboxes in Office 365.

### Advanced Automation

Archive Shuttle automates many complex, time-consuming or repetitive tasks and also includes powerful capabilities for filtering on multiple email attributes. The solution uses extensive workflows to automate the extraction and ingestion of archive data eliminating risk with backups and data integrity checks throughout the entire process.

### ABOUT QUEST

Quest creates software solutions that make the benefits of new technology real in an increasingly complex IT landscape. From database and systems management, to Active Directory and Office 365 management, and cyber security resilience, Quest helps customers solve their next IT challenge now. Quest Software. Where next meets now.
